

Programs Educational Objectives:

The graduates will

- **PEO1: Apply advanced technical skills** to solve complex engineering problems in the fields of electronics, communication, and related domains, with a focus on innovation, sustainability, and cost-effectiveness.
- **PEO2: Continuously adapt to evolving technologies** by acquiring new skills and knowledge, addressing the societal, ethical, and environmental challenges related to engineering practices.
- **PEO3: Work effectively in diverse, multidisciplinary teams**, demonstrating leadership and professional ethics, or pursue advanced studies and research in Electronics and Communication Engineering or related fields.
